

# The Future Security

## Environment:

### *Challenges to Maritime*

### *Superiority*

- The case for being there
- Character of future war
- Challenges for the future

Navy

VADM A. K. Cebrowski  
8 February 2001

# Enduring Navy Tasks

**Mastery of the seas**

**Project and protect long lines of communications**

**Land and support armies**

**Rescue armies  
and governments**

**Conduct blockades  
and enforce sanctions**

**"Gunboat diplomacy"**

## Navy's Core Products Job #1

- Freedom of the Seas
- Forward Deployed Combat Power

***"The best Ambassador is a man-o-war"***

# Navy Rule Set

**Cede no maritime areas**

*Grant no sanctuaries*

*The littoral must not be a barrier*

**Respond with speed**

*Combined Arms*

*Sea - based*

*Self - deployed*

*Interoperable*

**Serve the full range of national**

*A full service Navy*

# Competitive Space

**Operate forward vice strategic deployment**

*Speed of response*

*Alter initial conditions*

*Dominate the front end*

*Tacit knowledge building*

**Full spectrum combat vice recon / strike**

*A maneuver force*

*Output vice input measures*

*Deter, compel, reassure*

*Strong "low end" capabilities*

**Own the littoral**

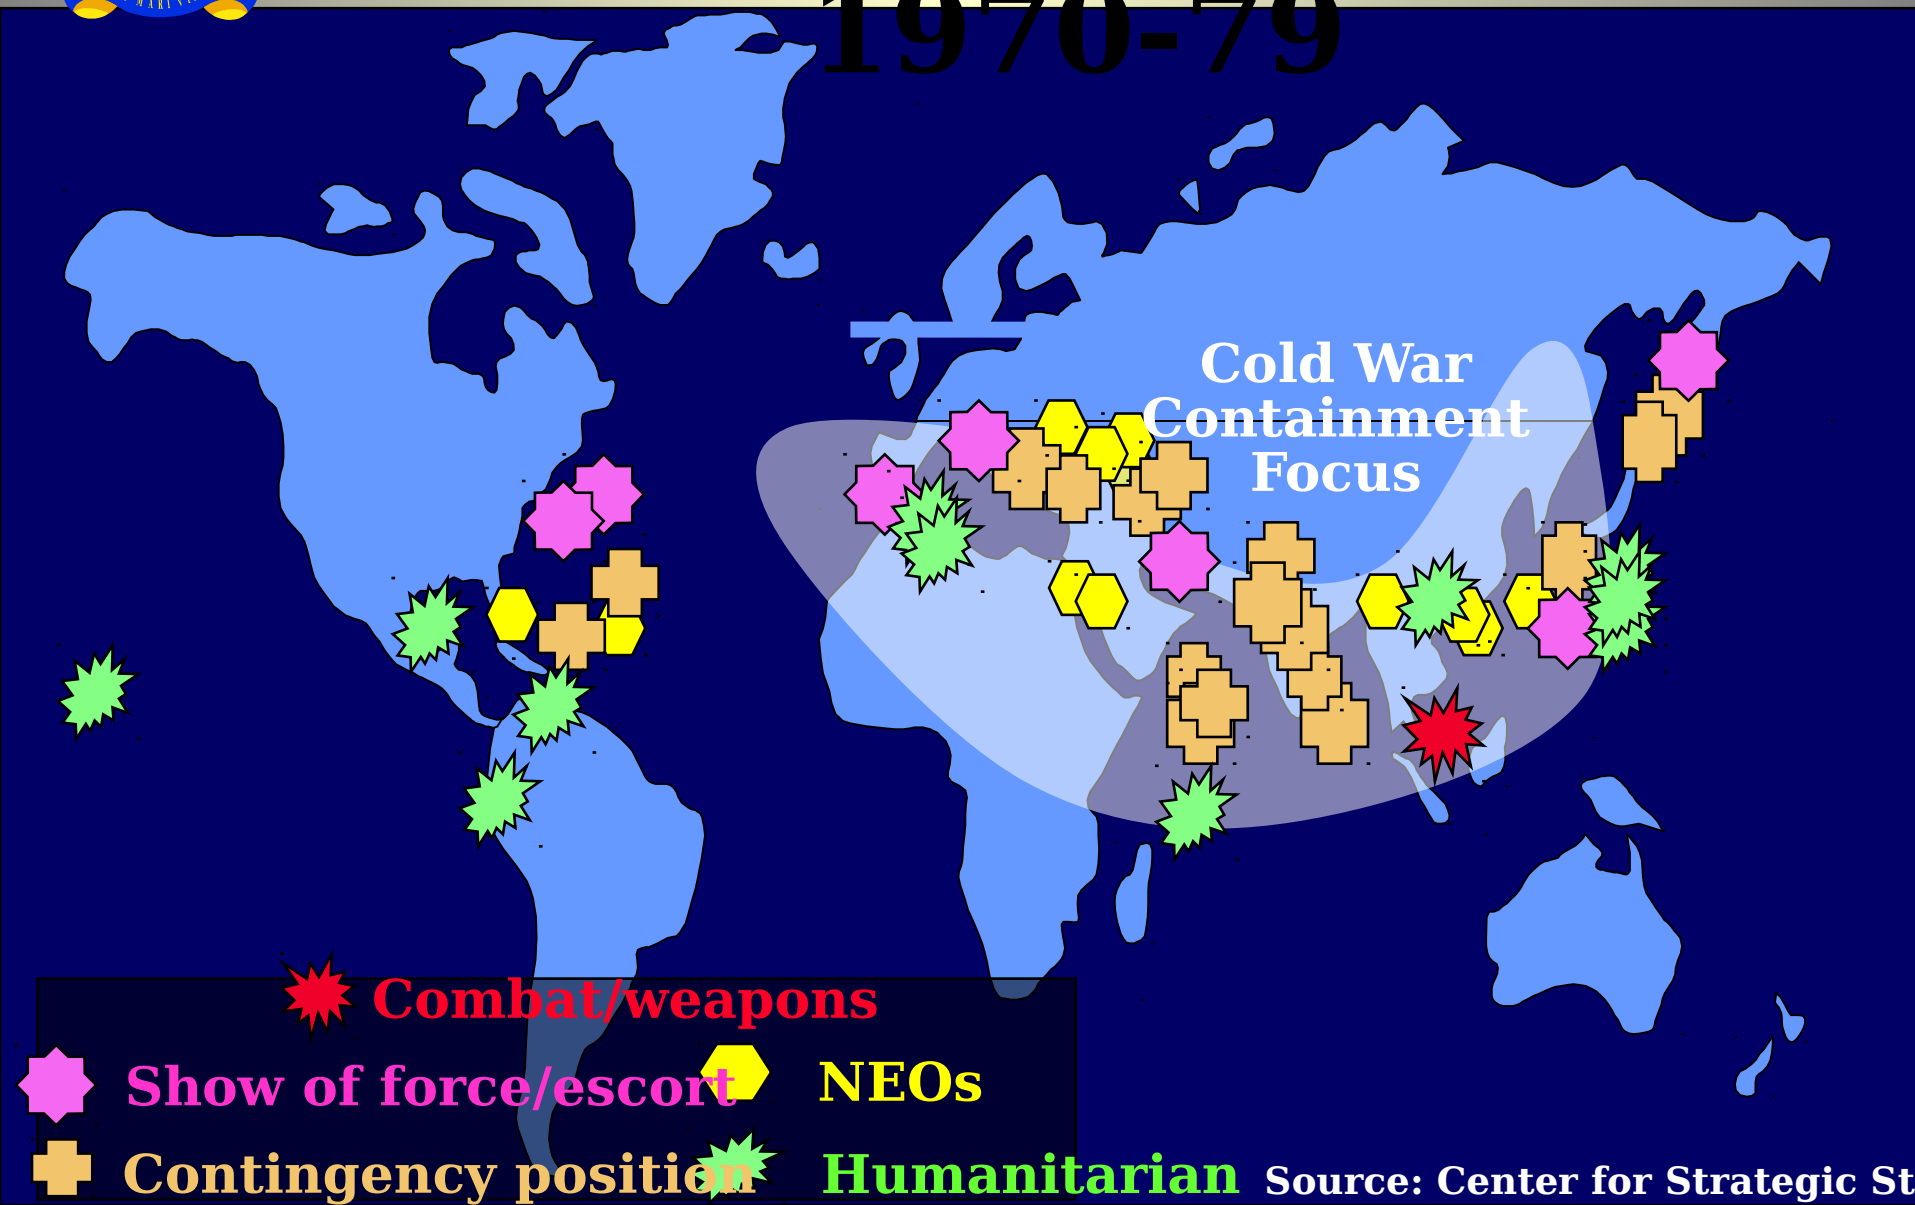

*Assured access*

*Expeditionary tiered sensors*

*Influence the nodes of global networks*

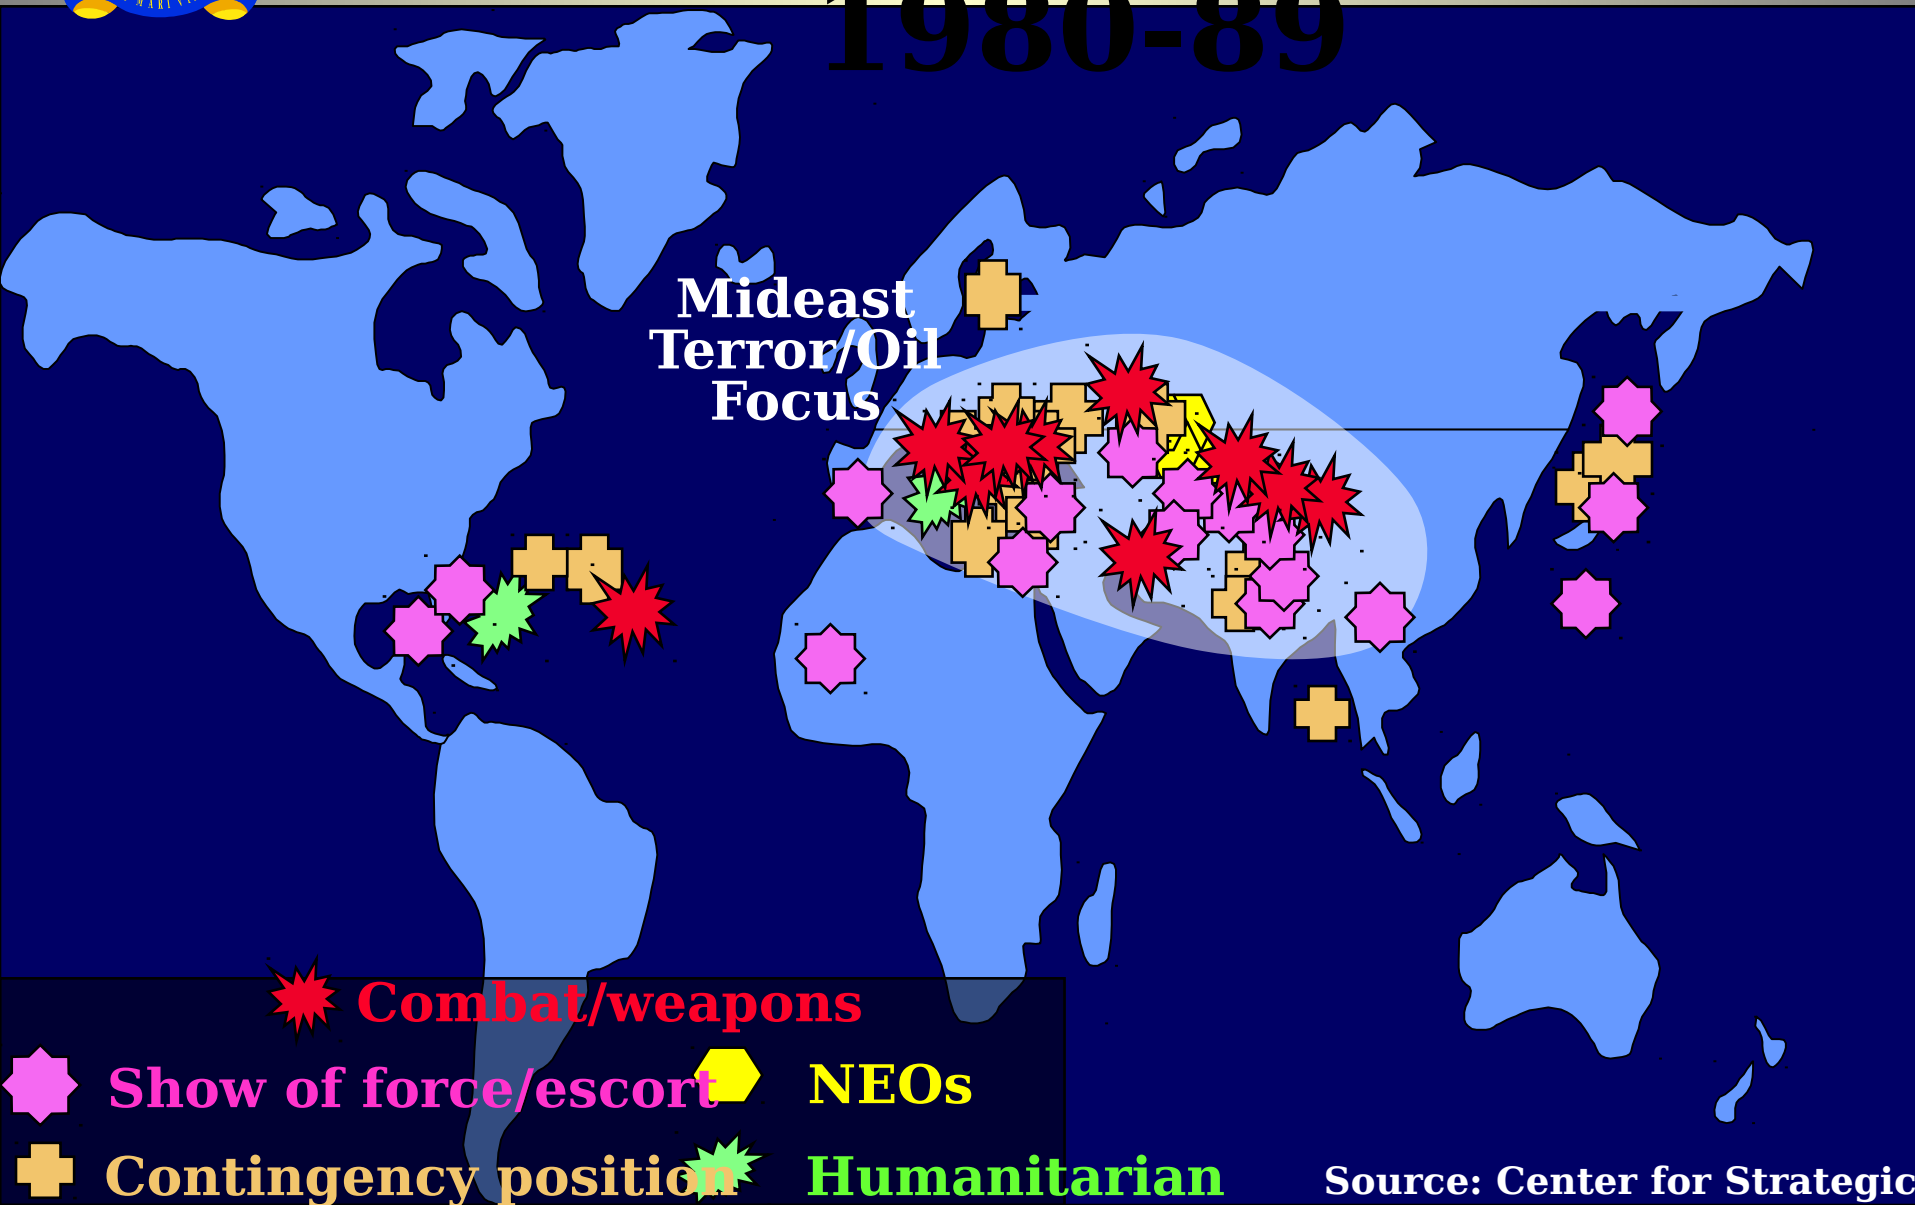

# U.S. Naval Responses, 1970-79

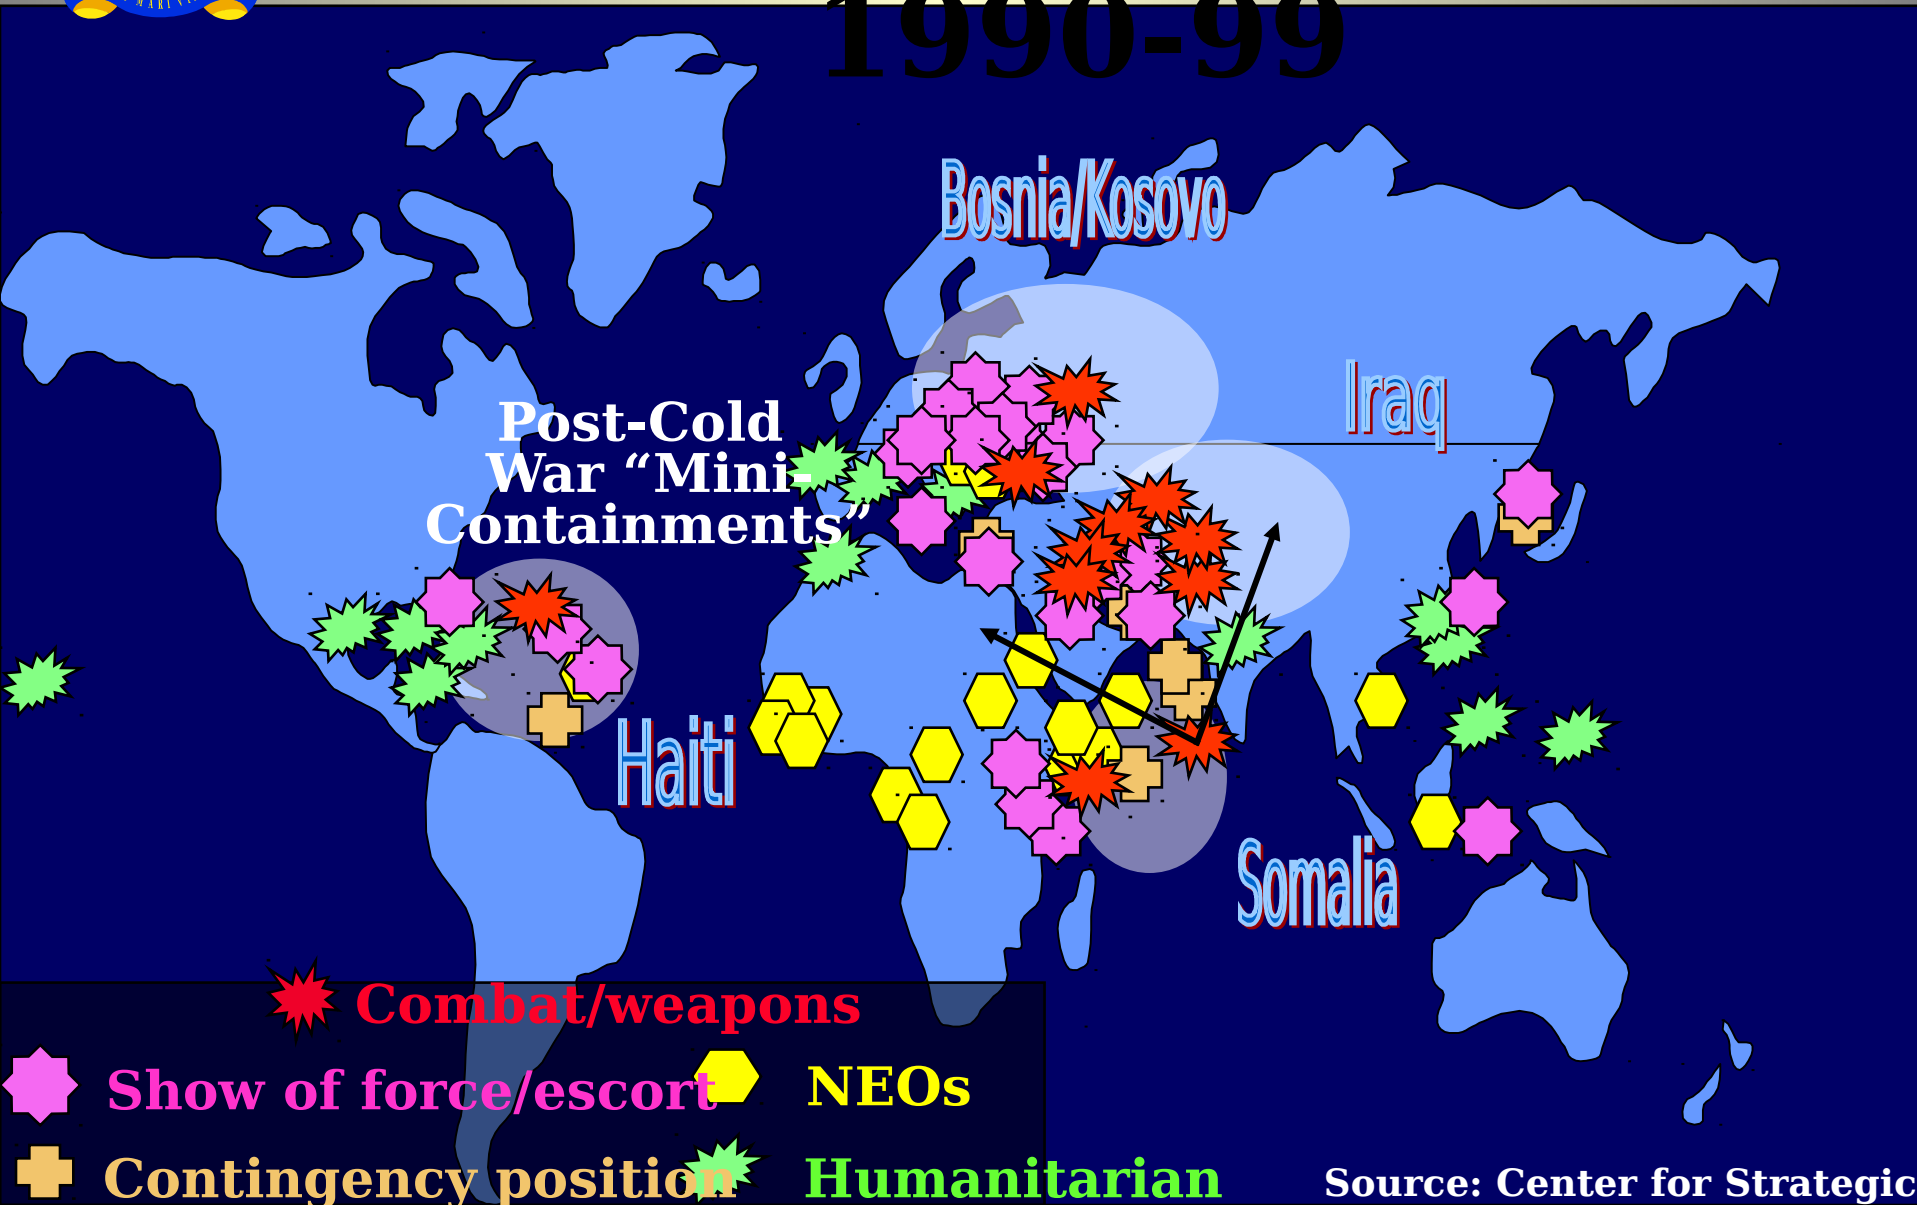

# U.S. Naval Responses, 1980-89

# U.S. Naval Responses, 1990-99

# National Security Environment

## *Alternative Futures*

- The U.S. is a ***status quo power*** in a rapidly changing age.... where we cause the change.

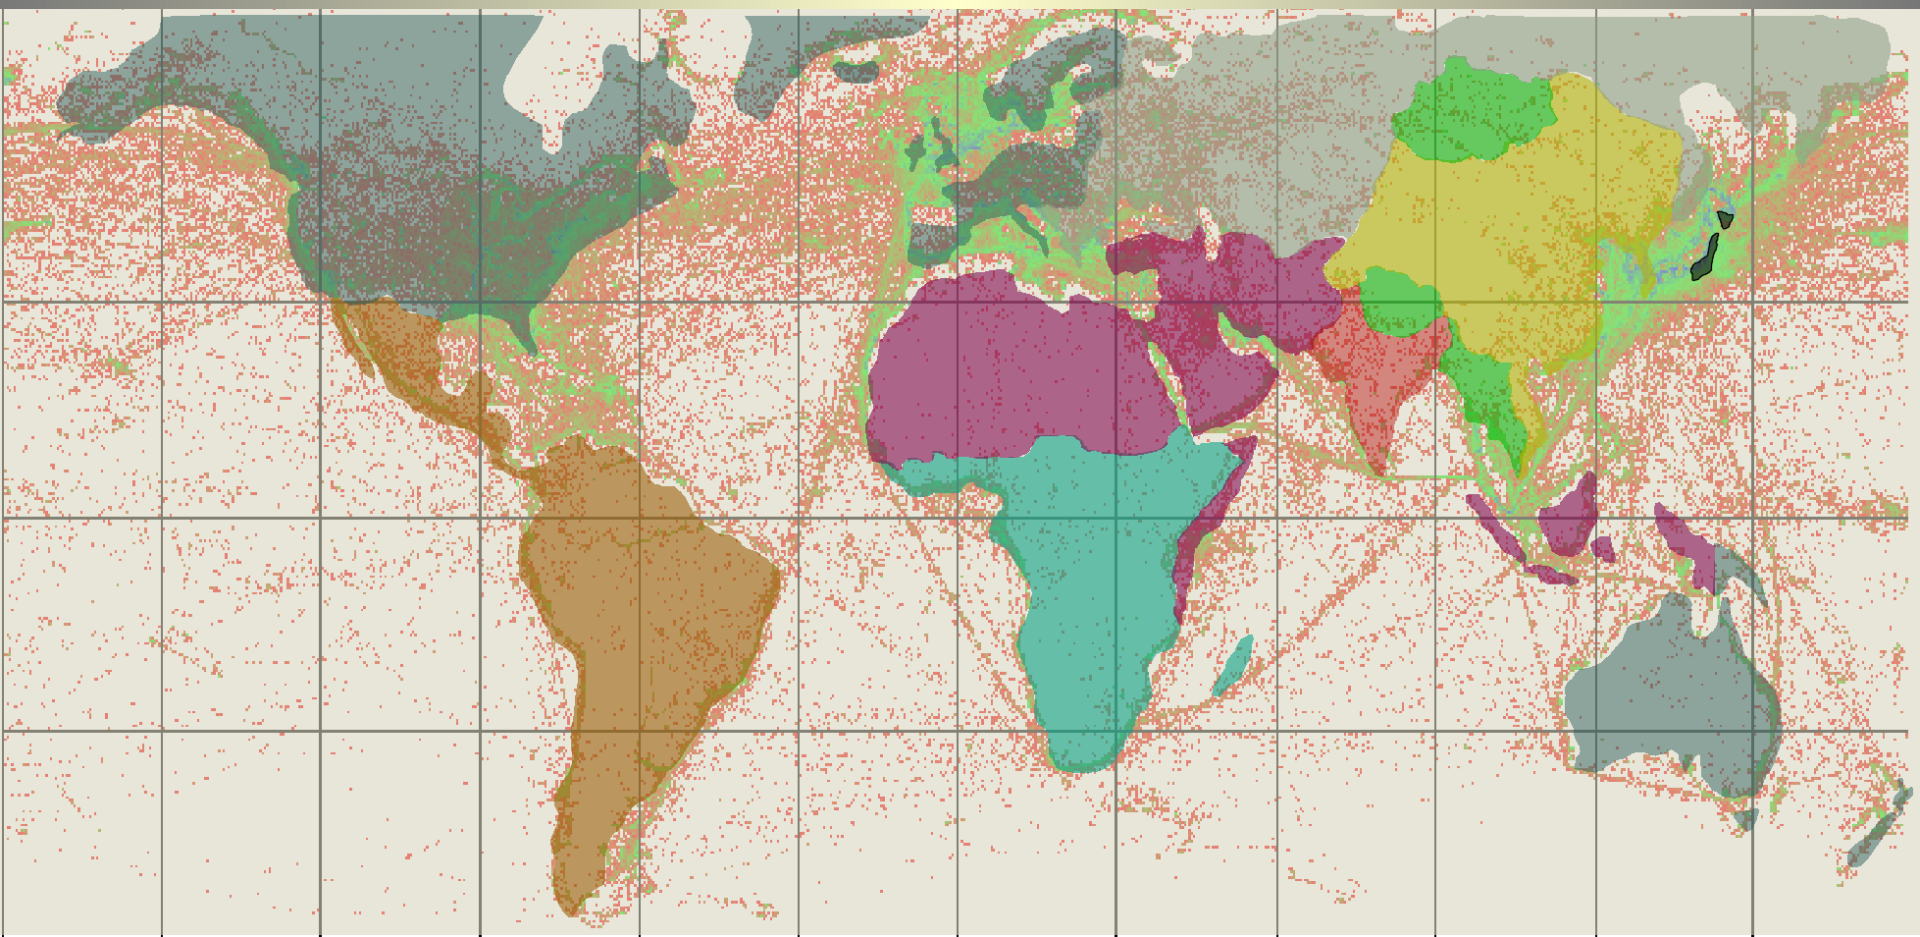

- ***Economic globalization*** is increasing.... as political entities are

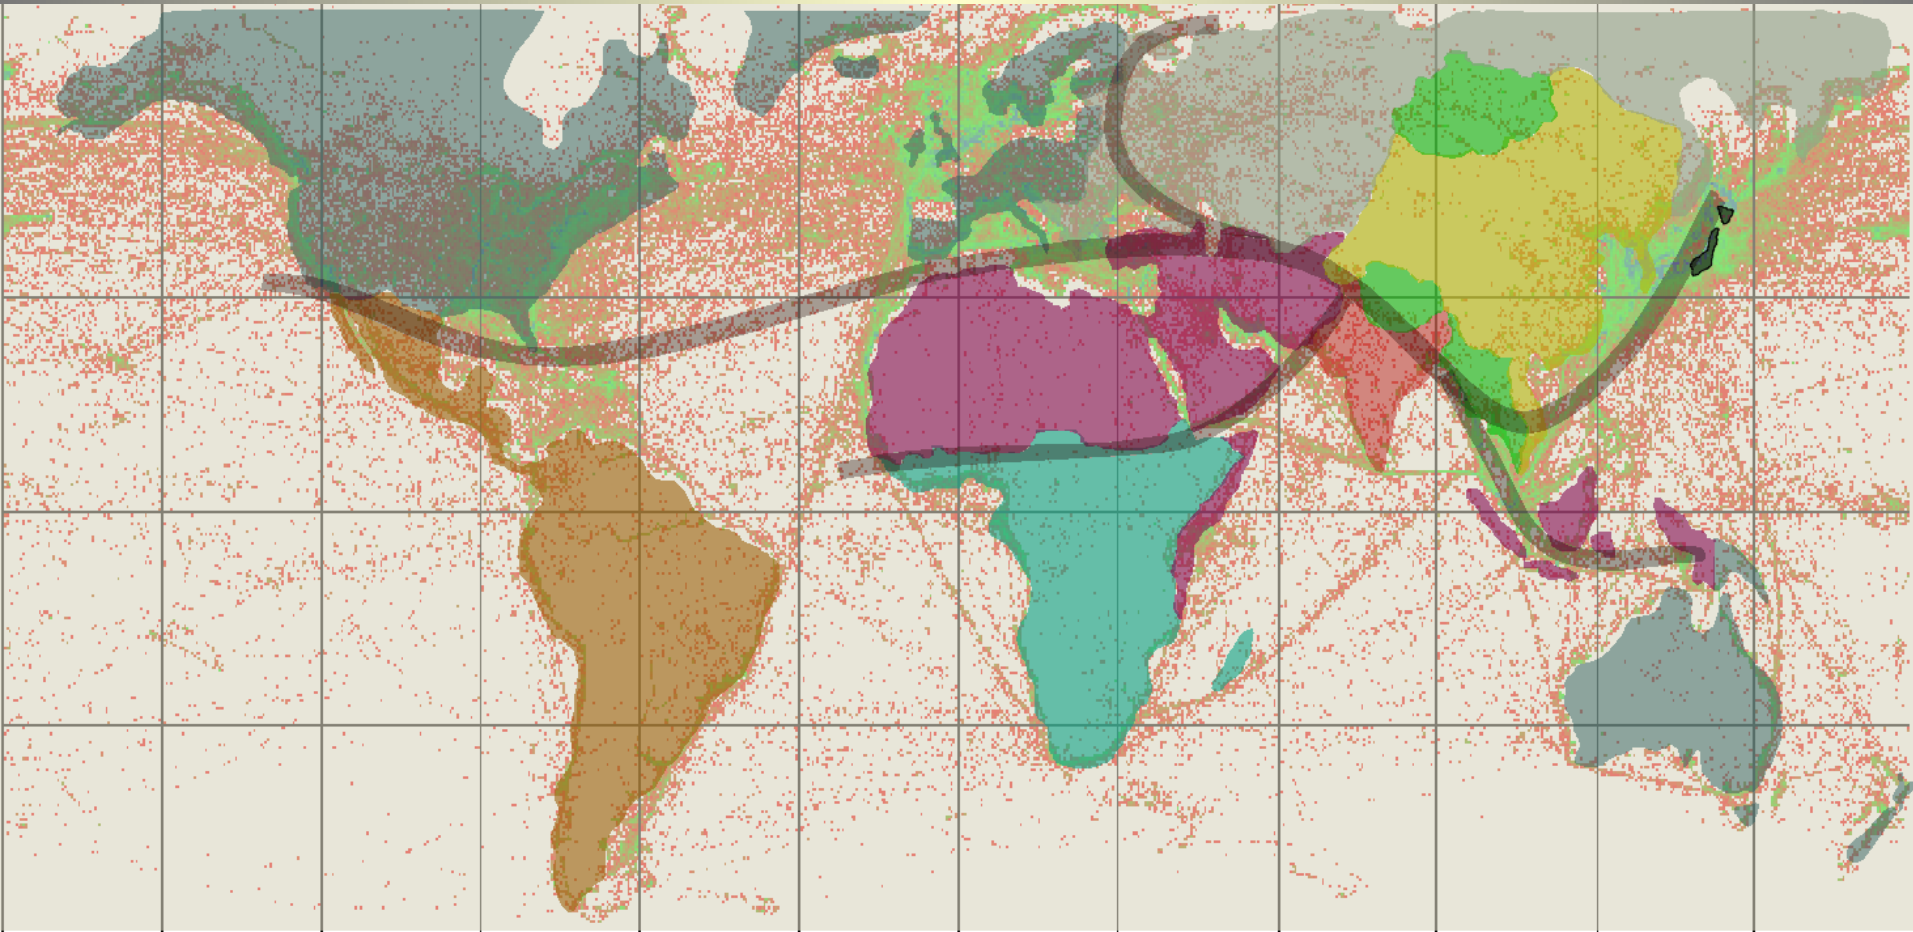

***Forward Engagement = Change + Stability***

# China's Choice, The Planet's Future

# Finding the Way : Decalogue

- 0 **Global energy market has the necessary resources**
- 1 **But no stability, no market**
- 2 **No growth, no stability**
- 3 **No resources, no growth**
- 4 **No infrastructure, no resources**
- 5 **No money, no infrastructure**
- 6 **No rules, no money**
- 7 **No security, no rules**
- 8 **No Leviathan, no security**
- 9 **No U.S. military, no Leviathan--so *national security-market connection must be understood***

# Projecting Sovereignty

- Demonstrates U.S. commitment to remain engaged
- Fosters political/military good will upon which coalitions, when required, can be built:

*Familiarizes forces with geography/environment*

*Fosters maritime cooperation/interoperability*

*Reassures allies*

*Team builds during peacetime*

- *Forecloses possibility of military success by aggressor*

*Key to exit strategy  
Helps integrate civil/military planning  
Forces present and deployable set timing  
and capability thresholds.*

*Dr. Ed Smith, Boeing*

# Sea Power Workshop

## *Key Findings:*

Continuous (as opposed to intermittent) presence in forward regions to be maintained *but increasingly difficult to do.*

US maintains Naval superiority for the foreseeable future *but guaranteeing that position requires that the US Navy transform itself and halt its slow but steady numerical decline.*

The relative utility of Naval forces will increase at the conventional level *as long as the Navy transforms itself.* Otherwise,

# Network-Centric Warfare

...The Emerging Theory of War

- Sources of Power
- Relationships among power centers
- Linkage to outcome
- Linkage to political objectives

Large Power

Challenger

Great Means

Little Means

Little Will

Great Will

*Effects-based Warfare*

*Dr. Ed Smith, Boeing*

# Effects - Based Warfare

## Targeting Means

### *Attrition-based*

Focus on “Targets”/  
“swift decisive”  
wars

Military Objectives

Quantifiable Results

- Indirect attack on will
- War/Combat only
- Deterrence:  
Retaliation  
Pre-emption

## Targeting Will/ Behavior

### *Effects-based*

Focus on “Actions”  
prolonged, low  
intensity conflict

Political Objectives

Non-linear Results

- Direct attack on will
- Peace, Crisis, War
- Deterrence:  
Prevention

INFO CONTENT

*Number of participants increases...  
As size of military decreases!*

# Challenges

## *...Technical*

- Counter precision  
*Weapons, navigation, sensors*
- Counter SEAD/DEAD
- Counter stealth
- Low cost cruise missiles
- High energy/density  
weapons
- Information operations
- Directed energy  
weapons
- Biologic weapons

# Challenges

## *Management* ...

- **Selecting new metrics**
- **Teaming with the new defense industry**
- **Introducing the new without jeopardizing TOA**
- **Moving to continuous adaptive acquisition**

# Challenges

## *...Operational*

- Achieving effects-based presence
- Winning information superiority

*Envelope management*

*ISR vs. WMD*

*Operational doctrine and organization*

• Shorter military operations
